Investment Objective

A multi-managed fund whose primary objective is to maximise long-term investment growth by investing in a range of opportunities available globally.

Risk Profile

This portfolio has a higher allocation to equities, resulting in increased volatility. It offers the potential for strong long-term returns, but also carries a significant risk of capital losses, particularly over shorter time frames.

Investment Philosophy

The fund may invest in global and local equity securities, exchange traded funds, government bonds, corporate bonds and inflation linked bonds, debentures, fixed interest securities, property shares, property related securities, preference shares, money market instruments and assets in liquid form. The fund may, from time to time, invest in listed and unlisted financial instruments. Asset exposure to investments outside of South Africa will always exceed 80% of the portfolio's net asset value. The benchmark is 65% MSCI ACWI, 20% FTSE WGBI and 15% SOFR.

Total Expense Ratio

A Total Expense Ratio (TER) is a measure of a portfolio's annual expenses, fees and charges, expressed as a percentage of the average daily value of the portfolio. These expenses include the annual management fees, VAT, audit fees, bank charges and costs incurred in any underlying funds. A higher TER ratio does not necessarily imply a poor return, nor does a low TER ratio imply a good return. The current TER ratio cannot be regarded as an indication of future TER ratios. Performance return information and prices are always stated net of the expenses, fees and charges included in the TER ratio.

Access to Information

- Additional information, including application forms, annual or quarterly reports can be obtained from IFM, free of charge or can be accessed on our website (www.itranactfm.co.za).
- Valuation takes place daily and prices can be viewed in the daily newspaper.
- Upon request the Manager will provide the investor with quarterly portfolio investment holdings reports.

FAIS Conflict of Interest Disclosure

Please note that your financial advisor may be a related party to IFM. It is your financial advisor's responsibility to disclose all fees he/she receives from any related party. The portfolio's TER includes all fees paid by the portfolio to IFM, the trustees, the auditors, banks, the co-naming partner, underlying portfolios, and any other investment consultants/ managers as well as distribution fees and LISP rebates, if applicable. The portfolio's performance numbers are calculated net of the TER expenses. The investment manager earns a portion of the service charge and performance fees where applicable.

Disclaimer

Itransact Fund Managers (RF) (Pty) Ltd ("IFM") is a registered Manager of the IFM Unit Trust Scheme, approved in terms of the Collective Investments Schemes Control Act, No 45 of 2002. Collective Investment Schemes in securities are generally medium to long term investments. The value of the participatory interests (units) may go down as well as up and past performance is not necessarily a guide to future performance. Performance is calculated for the portfolio. Forward pricing is used. Individual investor performance may differ as a result of the actual investment date, the date of re-investment and withholding taxes. The Manager does not guarantee the capital or the return of a portfolio. Collective Investments are traded at ruling prices and can engage in borrowing and scrip lending, however IFM does not currently engage in scrip lending. A schedule of fees, charges and maximum commissions is available on request. IFM reserves the right to close the portfolio to new investors and reopen certain portfolios from time to time in order to manage them more efficiently in accordance with its mandate. Performance figures quoted for the portfolio are from Morningstar and the Fund Administrator, as at the date of this document for a lump sum investment, using NAV-NAV with income reinvested and do not take any upfront manager's charge into account. Income distributions are declared on the ex-dividend date and may be subject to mandatory withholding taxes. Actual investment performance will differ based on the initial fee charge applicable, the actual investment date, the date of reinvestment and dividend withholding tax. Investments in foreign securities may include additional risks such as potential constraints on liquidity and repatriation of funds, macroeconomic risk, political risk, foreign exchange risk, tax risk, settlement risk as well as potential limitations on the availability of market information. This fund may invest into other Collective Investment Schemes, which may levy their own charges, which could result in a higher fee structure for these portfolios.

Certain investments, including those involving futures, options, equity swaps, and other derivatives may give rise to substantial risk and might not be suitable for all investors. Although reasonable steps have been taken to ensure the validity and accuracy of the information in this document, IFM does not accept any responsibility for any claim, damages, loss or expense, however it arises, out of or in connection with the information in this document, whether by a client, investor or intermediary. This document should not be seen as an offer to purchase any specific product and is not to be construed as advice or guidance in any form whatsoever. Investors are encouraged to obtain independent professional investment and taxation advice before investing with or in any of the Manager's products.
